SUMMARY

Computer Engineering undergraduate with hands-on experience building production-grade AI systems and full-stack web products. Skilled in LLM prompt pipelines, RAG-based retrieval, and local model workflows, alongside delivering end-to-end React/Next.js applications from data ingestion to polished interfaces. Focused on schema validation, operational reliability, and shipping things that actually work.

EXPERIENCE

Bytwise LLC (Buildur AI)

AI Prompt Architect Intern

Ahmedabad, India

Oct 2025 – April 2026

- Designed structured prompt architectures chain-of-thought, few-shot, and RAG-based patterns governing LLM output quality, consistency, and reliability across production use cases.
- Built end-to-end data pipelines covering ingestion, normalization, scoring, filtering, ranking, and structured output, creating a scalable content generation system for education and outreach.
- Implemented scheduled automation jobs to trigger pipeline runs, generate AI content, and sync data, reducing manual intervention to near zero across all operations.
- Led local LLM workflows via Ollama with a single 24/7 monitoring agent, driving cloud API costs to near zero; enforced Pydantic schema validation ensuring 100% parseable outputs with zero pipeline failures.

Tech Anubhavi

Full Stack Developer Intern

Remote

Feb 2026 – Present

- Architected full-stack applications using React, TypeScript, Node.js, and Python backends, delivering production-ready features across 2+ live client projects within agile sprint cycles.
- Engineered GPT-4 powered features, multi-role dashboards, and RBAC with full product lifecycle ownership from prototype through production deployment.
- Built secure backends with Firebase security rules, Firestore indexes, maintained CI/CD pipelines via GitHub Actions with zero regression.

PROJECTS

KongKnitec — Face Recognition Attendance System

Python · OpenCV · CNN · face_recognition

- Built a CNN-based face recognition pipeline achieving ~97% accuracy, processing bulk classroom attendance simultaneously in a single session.
- Automated post-session attendance reports emailed to faculty, eliminating manual follow-up.

Resume Scanner

Python · spaCy · NLTK · PyMuPDF · Streamlit

- Built an NLP-powered screening tool using spaCy word vector embeddings for semantic similarity, supporting PDF/DOCX/TXT with batch ranking and percentage-scaled scores.
- Deployed as a zero-config Streamlit app; preprocesses text via NLTK (stopword removal, tokenization) for recruitment workflows.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Streamlit, CustomTkinter

Backend: Node.js, Next.js API Routes, Firebase Admin SDK, REST APIs, SendGrid

AI / ML: LLM Prompt Engineering, RAG, LangChain, Ollama, OpenAI API, Azure AI, NLP (spaCy, NLTK), OpenCV, Pydantic

Tools & Cloud: Git, GitHub Actions, CI/CD, Microsoft Azure, Vercel, Linux, Firestore, SQLite

EDUCATION

Government Engineering College, Modasa

Bachelor of Engineering – Computer Engineering

Sept 2023 – June 2026

Gujarat, India

Government Polytechnic, Ahmedabad

Diploma in Computer Engineering — CGPA: 9.3 / 10

July 2020 – June 2023

Gujarat, India

CERTIFICATIONS & TRAINING

- Microsoft Data & AI Skills Program — CloudThat | Microsoft · ID: CT/25/945650 (July 2025)
- Introduction to Artificial Intelligence — Infosys Springboard (June 2025)
- Python Programming — Udemy (2024)
- Prompt Engineering — Udemy (2024)
